

Celebrating a Proud Milestone in the Melomed Nursing Journey - Short Learning Programme.

March 2025 marks a significant and exciting achievement in the Melomed calendar — the official launch of Melomed's very first short work-based programme tailored for General Registered Nurses across all five hospitals: Melomed Gatesville, Melomed Bellville, Melomed Mitchells Plain, Melomed Tokai, and Melomed Richards Bay.

This pioneering programme adopts a work-integrated learning approach, focused on enhancing and sustaining the quality of nursing care within our general, medical, and surgical units. It is a proud step forward in our ongoing journey to develop short, impactful programmes across various disciplines to support and uplift our nursing professionals.

The Melomed Executive Management Team wish to extend our heartfelt thanks to our nursing management teams, the dedicated training

department, and our Clinical Facilitators who will be leading the programme.

We are also grateful to our executive and management teams for their continued support of this important initiative.

We wish all involved every success over the coming months as we roll out this transformative programme and continue striving for excellence in patient care.
